

I CLAIM:

1. A hard disk comprising:
 - an MPU,
 - a memory unit coupled to said MPU, for data storing and accessing purposes,
 - a monitor control interface coupled to said MPU, for controlling said MPU,
 - a storing interface coupled to said MPU, for data storing and accessing purposes,
 - a transmission interface coupled to said MPU, for communicating with other facilities, and
 - a power unit coupled to said MPU, for energizing said MPU, said MPU being operatable with said monitor control interface to communicate with other facilities without coupling said hard disk to further facilities.
2. The hard disk as claimed in claim 1, wherein said transmission interface includes a wireless interface and a cable interface for communicating with the other facilities.
3. The hard disk as claimed in claim 2, wherein said cable interface is selected from USB interface or 1394 interface.
4. The hard disk as claimed in claim 1, wherein said power unit includes at least one battery and a power circuit.
